PROFESSIONAL SUMMARY

Senior Backend Engineer with **8+ years of experience** designing and scaling **Node.js-based systems** for enterprise and high-traffic applications. Proven track record of delivering **low-latency APIs, cost-optimized AWS deployments, real-time systems**, and **secure payment integrations**. Strong ownership mindset with experience leading backend delivery, improving system reliability, and driving measurable improvements in performance, scalability, and operational cost.

CORE TECHNICAL SKILLS

- **Backend & APIs:** Node.js, Express.js, PHP (CodeIgniter), REST APIs, Microservice
- **Frontend:** React.js, JavaScript, Node (NVE), jQuery
- **Databases:** MongoDB, PostgreSQL, MySQL, SQL Server, Document DB
- **Cloud & DevOps:** AWS EC2, S3, SNS, CI/CD, Git, GitHub
- **Real-Time & Async:** Socket.io, Background Jobs, Batch Processing
- **Other:** Redis, Payment Gateway Integration , DSA, RTK Query

PROFESSIONAL EXPERIENCE

Senior Developer

Tata Technologies Limited – Pune

September 2021 – Present

- Architected and delivered **scalable Node.js backend services** supporting **automotive and manufacturing enterprise clients**, handling **thousands of daily transactions**.
- Led **production deployments on AWS (EC2, S3)** with **zero-downtime release strategies**, improving release reliability and reducing rollback incidents.
- Optimized AWS infrastructure by implementing **S3 lifecycle policies and resource cleanup**, resulting in **$6,500+ annual cost savings**.
- Designed secure **file-upload and bulk-processing pipelines** (CSV/XLSX), processing **large datasets without API timeouts** using batching and background workers.
- Integrated **payment gateways** for transactional workflows with strong validation, error-handling, and audit logging.
- Improved API performance through **query optimization, indexing, and connection pooling**, reducing average response time and operational incidents.
- Played a key role in stabilizing production systems, helping improve **MTTR and overall application reliability**.
- **Tech Stack:** Node.js, Express.js, MongoDB, PostgreSQL, Payment Integration, AWS (EC2 / S3/ SNS).

Node.js Developer

AIS Technolabs Private Limited - Ahmedabad

May 2019 – August 2021

- Built and enhanced **real-time multiplayer gaming platforms** using **Node.js and Socket.io**, supporting **high-frequency bidirectional communication**.
- Designed low-latency event flows for **live betting, game state updates, and chat**, improving user engagement and session continuity.
- Integrated **cryptocurrency-based payment systems (Coin Payment)** with transactional validation and reconciliation.
- Improved backend stability and responsiveness under concurrent load by optimizing event handling and database interactions.
- **Tech Stack:** Node.js, Express.js, Socket.io, MySQL, JavaScript, jQuery, Coin Payment

PHP Developer
Creatoweb IT Solution - Indore
October 2017 – April 2019

- Developed and maintained web applications using **Core PHP and CodeIgniter**, delivering multiple client projects end-to-end.
- Optimized **MySQL queries and application logic**, improving page load times and system reliability.
- Implemented cross-browser and responsive UI using HTML, CSS, JavaScript, and jQuery.

Tech Stack: PHP, CodeIgniter, MySQL, JavaScript, jQuery, Ajax.

KEY PROJECTS & IMPACT

Cummins Saathi – Mechanic Loyalty:

Role: Team Lead (Backend)

- Led backend architecture and API design for a **mechanic loyalty ecosystem** supporting rewards, communication, and support workflows.
- Designed and deployed **microservices-based REST APIs**, enabling scalable feature expansion.
- Coordinated directly with the client for requirement breakdown, delivery planning, and release execution.
- Integrated **enterprise APIs via MuleSoft**, ensuring secure and reliable cross-system communication.
- Deployed and maintained services on **AWS EC2**, ensuring stable production handover.

Tech Stack: Node.js, **Express.js**, **MongoDB**, **AWS EC2**, **Mulesoft**, **Microservices**.

sWorkshop – Jaguar & Land Rover:

Role: Backend Developer

- Built APIs to manage **end-to-end vehicle service workflows** (appointments, diagnostics, repairs, inventory).
- Designed **PostgreSQL schemas and indexes,** improving query performance in **high-concurrency service centers.**
- Integrated Dealer Management Systems (DMS) for real-time service history, parts, and warranty data.

Apollo Tyres - Bulk Ticket Upload & Processing

Role: Backend Developer

- Designed **bulk upload APIs** to ingest large Excel/CSV files and create service tickets at scale.
- Implemented **data validation, duplicate detection, batching, and background workers**, preventing timeouts and ensuring data integrity.
- Added structured logging, retry logic, audit trails, and per-record processing reports, significantly improving operational visibility.
- Enabled business users to track upload status, errors, and processing outcomes in real time.
- **Tech**: Node.js, Express.js, MongoDB, XLSX/CSV parsing, AWS EC2.

EDUCATION

MCA - Computer Application ATSS IICMR College, Pune

BCA - Computer Application Prof. Ramkrishna More College, Pune

AWARDS & RECOGNITION

- **Best Performer – Employee of the Month,** Tata Technologies Limited
- **Best PHP Developer Award** – Recognized for mentoring developers and solving complex technical issue
